White's MXT All Pro

The MXT All Pro combines popular new features with the proven, legendary performance of the MXT line — it's like having three metal detectors in one! You'll enjoy its all-new keypad, high-efficiency backlight, and Ground Grab settings lock. This favorite comes with a 10" DD search coil. Three separate programs give you versatility with different target responses, display info, and audio frequencies for relics, prospecting, and coins/jewelry.

Relic: Specifically identifies buttons, buckles, and bullets with three options for tone ID.

Prospecting: Iron Grunt for targets for high probability of being iron.

Coin/Jewelry: Coin/jewelry/trash target ID with seven tones telling you the type of target before you dig.

All modes have deep-detection from White's proven 10" DD Coil, VDI range of -95 to +95, and 3-easy-to-adjust controls:

Gain maximizes sensitivity and depth. **Threshold** allows you to hunt with a slight hum or hear only the sound of detected targets. **Dual** control functions differently in each program.
